

Dear Sir/Madam,

I respectfully ask that you reject the NAB's petition 04-160 to block access to public service broadcasting which includes traffic and weather reports. This is a reliable service that I pay for. Through satalite radio I receive more timely and accurate traffic and weather reports than is currently available through local radio stations.

Broadcast television news and weather programs coexist with the cable TV Weather channel coexist. This coexistence should extend to radio as well.

Sincerely,

Mark Marshall
